

Web Interface Empowers Home Care Agencies with Actionable Business Intelligence Data and Benchmarks that Reduce Costly Documentation Errors and Improve Outcome Scores

CARY, NC and Santa Barbara, CA (June 12, 2008) – [CareAnyware](#), Inc., and [Strategic Healthcare Programs](#), LLC (SHP) today announced a technology interface that links SHP's award-winning tools for performance management with CareAnyware's industry leading web-based Home Care and Hospice management system. The interface between the two systems empowers agencies with real-time, web-based decision support data for operational, clinical and financial excellence.

"Agencies are looking for ways to improve efficiencies, reduce coding and documentation errors and maximize payment," said Rich Guerin, CEO of CareAnyware. "Pairing the leader in web-based agency management with the leader in web-based decision support and benchmarking gives agencies precisely what they're looking for. They get direct access to high-level and drill-down views of key financial, administrative, and clinical performance metrics."

Barbara Rosenblum, CEO of SHP, said, "I'm impressed by management software companies that make the decision to partner with specialists. This decision allows CareAnyware to bring the best solution to its clients so they can concentrate on their own product's development and the support of customers rather than re-creating the wheel. CareAnyware has certainly demonstrated technology and business vision."

About SHP, LLC

Strategic Healthcare Programs, LLC, based in Santa Barbara, California, offers award-winning, real-time, web-based performance data services and benchmarking for the entire spectrum of home care, serving 1,800 clients across the country. www.SHPdata.com

About CareAnyware, Inc.

CareAnyware is a Software-as-a-Service (SaaS) provider that develops and manages mobile and web-based applications for home health and hospice providers. Its comprehensive agency management and clinical solutions streamline tasks related to data entry, scheduling, clinical management, billing and reporting, and information exchange. CareAnyware's easy-to-learn, web-based product is offered as a monthly service, which dramatically reduces the up-front costs, time and resources required for implementation. CareAnyware is a privately held company based in the Research Triangle Park region of North Carolina. For more information, please visit <http://www.careanyware.com> or contact Gene Gallogly at (866) 260-4630 x207.
