Strategic Healthcare Programs, LLC (SHP) Announces Automated Interface with Cerner BeyondNow™ Home Health Software Application

June 26, 2007 (Santa Barbara, CA) - Strategic Healthcare Programs (SHP), provider of real-time data services, outcomes, and benchmarking to the home care market is pleased to announce the release of another automated data interface with between SHP and Cerner BeyondNow™'s home health software application, HomeWorks. This interface facilitates *automatic*, electronic exchange of data, including OASIS data and other key information, from *HomeWorks* application to SHP for Agencies™.

According to Barbara Rosenblum, Chief Executive Officer of SHP, "Our mutual customers will benefit significantly from the interface through instant and simple access to information like expanded OASIS audits with alerts, current clinical and financial benchmarks, data drill-down reports, and PPS tools. The data sweeper automatically uploads data from *HomeWorks* to SHP reducing the tasks an agency has to manage, enabling real-time access to key PPS and outcomes reports. *HomeWorks* users can now, more easily than ever, participate in the leading and most comprehensive data and benchmarking program on the market."

Strategic Healthcare Programs, LLC, is based in Santa Barbara, California. SHP offers award-winning performance data services, industry benchmarks, and patient satisfaction programs to over 1500 customers. SHP sweeps data from software applications and automatically returns real-time, actionable information. Web-based analytic tools and drill downs make ad hoc reporting available to the entire home health organization. To learn more about SHP for Agencies™ or other programs for the sub-acute market, visit www.SHPdata.com.
