Disease management:

Cut costs and improve outcomes for CHF and COPD patients

CHF and COPD patients are among the most frequent fliers into the hospital, hurting outcomes and your bottom line.

Register today for the [National Quality Outcomes Conference](#) and find out how one agency integrated clinical respiratory therapists, used a standard visit schedule with frontloaded visits and implemented telemonitoring to **catapult its scores into the top 10% nationwide** for improvement in dyspnea. **And the best part:** The average profit for these patients increased \$500 per episode.

Plus, you'll get these valuable Bonus Tools to take back and use at your agency -- **Disease management pathways for CHF and COPD, high-risk pathway for acute care hospitalization and teaching and auditing tools** and techniques.

And that's just ONE session! To see the full program [click here](#).

Every session gives you work tools to implement these strategies straight away at your agency. **PLUS**, get the latest guidance at a special 1-day pre-conference -- **OASIS Accuracy Workshop, Sept. 5. [Click here](#) for details.**
