Strategic Healthcare Programs (SHP) and HealthWare Corporation Announce the Availability of a Data Interface

September 17, 2007 (Santa Barbara, CA) – Strategic Healthcare Programs (SHP), provider of real-time data services, outcomes, and benchmarking for the home care market is pleased to announce the release of a data interface with HealthWare Corporation, a provider of outcomes, benchmarking and OASIS data services to the home care market. The interface facilitates automatic, electronic exchange of OASIS data and other key information, from HealthWare to SHP.

According to Jim Voytek, Chief Executive Officer of HealthWare Corporation, "Our customers will now have the ability to submit their OASIS data automatically to SHP and have it analyzed with no additional steps. The PPS and outcome reporting provided by SHP back to the agency will be invaluable tools that our agencies can use to improve patient care while at the same time saving resources."

The interface has already been in use by SAAD'S Healthcare in Mobile, Alabama for the past year and a half. The Director of Client Services for HealthWare Corporation, Karla Remail, reports, "This has been one of the easiest interfaces we've had the pleasure of implementing and supporting, and are excited that we are rapidly getting requests to roll this out at other mutual customers. It's obvious everyone is doing what they can to prepare themselves for the PPS changes they are about to face come January."

The HealthWare System is optimized for the price/performance advantages of the Microsoft Windows Desktop and Server environment and it integrates with the Microsoft Office System. It is a powerful and scalable multi-tier application that uses Microsoft Windows 2003 Server as its network foundation and Microsoft SQL Server™ 2005 for database management and Microsoft SQL Analysis Services and Office for business intelligence. Client workstations may use Microsoft Windows® XP or Vista. You can also use HealthWare with Windows 2003 Terminal Services.

For more information on HealthWare Corporations' HealthWare suite of applications, contact sales at 800-239-1498, visit www.healthware.com or e-mail sales@healthware.com. Founded in 1986, HealthWare Corporation is a leading producer of healthcare software. The company offers a wide range of products, services, training, and support, whose purpose is to make it easier and more enjoyable for people to take advantage of the full power of information systems every day.

About SHP

Strategic Healthcare Programs, LLC, is based in Santa Barbara, California, and offers award-winning web-based performance data services for the entire spectrum of home care, serving 1,500 clients across the country. SHP uses proprietary data "sweeps" to collect data from software applications and returns real-time, actionable information. Online analytic tools and drill downs make ad hoc reporting available to the entire client organization. For more information, please contact SHP at (805) 963-9446, or visit www.SHPdata.com.
