STRATEGIC HEALTHCARE PROGRAMS

SHP for SKILLED NURSING℠
A better way to manage your care and gain referrals

With Value-Based Purchasing (VBP) and the new PDPM model, it is now more important than ever to have access to actionable, real-time SNF performance data that helps you:

- ☑ Improve readmissions, quality of care, and outcomes

- 📈 Demonstrate value to referral partners and payers

- 📊 Proactively manage your high-risk residents

- 🕐 Optimize your staff efficiency and resource usage

- ⬡ Win in the PDPM and VBP environment

SHP for Skilled Nursing is a web-based performance improvement platform that gives SNFs the power to proactively improve their quality of care and strengthen referral partnerships and payer relationships.

? **Our SNF reporting suite was designed to help teams address such questions as:**

- *What specific factors impact my readmission rates?*

- *Am I providing the right amount of therapy to achieve the best functional improvement?*

- *How do I identify residents at high risk of readmission?*

- *How do I demonstrate to my referrals that we are a valued partner?*

- *How do I proactively monitor and track residents after discharge?*

Utilize SHP's unique algorithms to:

Identify residents at high risk for readmission.

Review your resident's functional score at admit and at discharge.

Measure functional outcomes versus therapy provided for resource optimization.

The SHP for SNF solution is easy to use.

- We automatically gather real-time data by partnering with your EHR vendor to gain access to your ADT and MDS files.
- We then integrate your data into a suite of actionable reports that you can access via our web portal at any time.
- SHP provides unlimited training, unlimited support and unlimited users.
- All implementation is provided by SHP at no additional charge.

Segment your data across multiple categories to understand and quickly respond to a particular issue.

For example, view your readmission and functional improvement metrics by a referring partner, facility, unit or clinical category, down to resident level.

WHY SHP for Skilled Nursing?

✓ Real-time view into performance & operations

✓ Easy-to-use interactive reports with visual identification of trouble areas

✓ Drill down and segment data across multiple filters to identify root-causes

✓ Consistent and convenient way of compiling actionable data

Here are a few examples of how you may use SHP for Skilled Nursing reports to manage your operations:

- Send the SHP Referral Scorecard to your hospital, so they can see your metrics for THEIR specific patients prepared by a trusted 3rd party
- Review readmission rates by various time periods or by clinical segments to identify specific areas for improvement
- Identify the right amount of care for your residents that achieves the strongest functional improvement
- Identify which specific home health agencies your high risk residents were discharged to proactively follow up on their care
- Compare performance metrics across facilities, units, and shifts... and many more!

About SHP

Strategic Healthcare Programs (SHP) is a leader in data analytics and benchmarking that drive daily clinical and operational decisions.

Our solutions bring real-time data to post-acute providers, hospitals, physician groups and ACOs to better coordinate quality care and improve patient outcomes. In business since 1996, SHP has built deep expertise and a strong reputation to help organizations nationwide raise the bar for patient care.
