

A POST-ACUTE NETWORK MANAGEMENT SOLUTION

CareStat®

Manage **Post-Acute Networks**
with **Real-time Data**

To build better partnerships within a high-quality post-acute network you need accurate, real-time, relevant data. **CareStat® by SHP** accesses real-time post-acute care quality and outcome metrics to deliver a comprehensive, web-based solution for health systems, ACOs and payers. With CareStat you can impact readmissions, length-of-stay, clinical outcomes, and patient and resident satisfaction. CareStat® helps you:

- ☑ Achieve a true understanding of your post-acute network's performance
- ☑ Conduct productive meetings using real-time patient-level data
- ☑ Lower readmission rates with predictive modeling algorithms
- ☑ Manage length-of-stay and track each patient's functional improvement score
- ☑ Maximize outcomes in value-based programs – BPCI, MSSP, etc.
- ☑ Support patients' post-acute care choice with current metrics that matter
- ☑ Eliminate laborious manual data collection and use of outdated data

Nearly
5,000
home health
agencies and
3,000
skilled nursing
facilities use SHP
to manage their
performance

CareStat® platform currently connects

1,000 post-acute providers
with their acute care partners and the network is growing.

CareStat, a web-based solution from SHP, **facilitates data sharing among providers** with a consistent, real-time view of performance across the post-acute continuum. As a health system, you can securely understand performance of your skilled nursing and home health partners. **Forge strong partnerships with cooperative, objective, and data-fueled discussions.** CareStat® allows you to:

1. Know Your Skilled Nursing and/or Home Health Providers

CareStat's post-acute organizational level reporting provides a consistent trended view of:

- Overall quality
- Hospitalization rates
- Timely Initiation of Care results
- Discharges to community
- Clinical and operational outcomes

Filter reports by only your shared patients or by specific diagnosis categories in order to get to the heart of issues and suggest the best care decisions.

3. Know Your Value-Based Program Results

Sort all reports by service line – diagnosis category, BPCI, MSSP, etc. Understand your specific patient populations, where you carry risk, and progress in their care status.

CareStat®

2. Know Your Patients

Track clinical and operational outcomes at the patient level. Drill into each patient's post-acute experience with such data tracking as:

- Acute care hospitalizations
- Functional outcome scores
- Admission and discharge metrics
- Timely Initiation of Care

4. Know Your Market

Compare your network's performance against state and national averages. SHP has access to data on 68% of all Medicare home health episodes and also works with ~3,000 skilled nursing facilities in the country with the number growing daily.

Quick time to market

12 WEEKS

on average

“Now that we're using CareStat, we have the same data across all of our home health agencies and there're no questions. Agencies don't have to spend time pulling the data, we don't have to spend time going through it. It's just great benchmarked data that is consistent, reliable and timely.
